

## Mohs Surgery Steven Smith, MD, Wellesley, MA

“Excellagen gel proved to be an outstanding healing agent for an extensive Mohs surgery wound. It is an economical alternative to costly skilled nursing care.” – Steven Smith, MD

**Day 14: After One Excellagen Treatment**

**Day 22: After Two Excellagen Treatments**

**Day 49: After Three Excellagen Treatments. Full Re-Epithelialization**

Initial surgical wound size: 6.4x5.4 cm  
Wound size at 4 weeks (one week after third treatment): 2.5x4.5 cm

Patient Data	
Age	75
Sex	Male
General Health Status	Nursing home resident with dementia. Mohs surgery performed on recurrent squamous cell carcinoma. Repair with skin grafting not feasible due to expectation that patient would disturb surgical dressings.
Mohs Surgical site	Left-Posterior Ear/Mastoid.
Excellagen Treatment	Days 4, 14, and 22 post-surgery

Excellagen is indicated for the management of wounds. Although many patients benefit from the use of the product, results may vary. Please see full prescribing information.
